

ICT 2212 - Final Presentation Guidelines

Presentation Guidelines

Please adhere to the following criteria when preparing the presentation.

The content should include

- Topic – (Please mention the group name in the right bottom corner of the slide)
- Group List – (With registration numbers and index number according to the order of presenting)
- Introduction
- Aims and Objectives
- Requirement Specification
- Methodology
- Development(Include the functions that have been implemented in the project.Can include important codes if you have)
- Conclusion (Conclusions of the project, Lessons learned and skills earned,Recommendations for improvements)

Presentation video Guidelines

You will get 15 minutes for the entire presentation.

Within the first 5 minutes you have to give an overall description on the project. (Explain your problem, your objectives, your technical solutions)

Then you need to explain your individual contribution one by one.

Note – All the members in the team should do the presentation.

The video of the narrator should be turned on while presenting

Upload the video of the presentation to the link provided in the classroom.

Rename the presentation with group number

Compulsory -: A demonstration of your system should be included.

Submission Guidelines

Submit the following in a single folder

Final Presentation

Presentation video
